

Minutes of the Milton Frye Nature Area Committee for December 4, 2014

Present: George Clark, Phyllis Katz, Jennifer Newberry, Lindsay Putnam

The next meeting of the committee on January 8, 2015 is to begin with a walk to designated sites suggested as a location for a proposed educational structure. Town officials and the public are invited to join in this walk.

Jennifer Newberry is to be the leader in preparing a grant application in support of the proposed structure, and Nathaniel Perron will also be raising funds. Estimates of construction costs will be needed for use in the grant application.

Lindsay Putnam has communicated with two licensed contractors for planned consultation about potential chemical control of invasive plants. A third such contractor has yet to be contacted.

Recent efforts to control invasive plants in the nature area are to be more widely publicized. Inquiries are to be made about possible publication of an article in a local paper, and preparation of an account for the town website is anticipated.

Respectfully submitted,  
George Clark
