Subject: Public facilities

When I listened or read comments regarding the proposed new police station, renovated fire station, and public works facility, it seemed a clear majority of people who spoke out recognized the need to renovate or repair all three locations. The differences were over process, design, or cost. It is now up to this new Selectboard to determine how to proceed from here.

As I stated publicly during the debate, our police station is unsafe, with proper police practices impossible in their current location. The fire and public works building and outdoor storage areas are unhealthy both physically and financially.

I know you have your work cut out for you, and have every belief that you will diligently pursue a solution. My request is that this be treated as a very high priority item in order to provide our outstanding public servants habitable, useful and safe facilities. If this could be done in time to bond this summer, taking advantage of the low interest rate it would be to everyone's advantage.
