Selectboard,

The Norwich Energy Committee would like to invite you to a celebration of Town facilities going solar.

Since December 2014, the electricity used by Town facilities has come from a solar project developed by Solaflect Energy. The Energy Committee is pleased to have proposed this arrangement to the Selectboard back in the summer of 2013, and delighted that the Selectboard agreed to pursue it.

Consistent with ensuring that all the "green attributes" of the solar electricity are retained, the Town of Norwich is one of very few towns to be able to proudly say that it is 100% solar.

On Sunday, October 4, Solaflect Energy is hosting an event to celebrate this accomplishment, and we'd like to invite Selectboard members to attend. Solaflect Energy is providing free food, live entertainment, and we hope to have some key supporters of Vermont renewable energy in attendance as well. The activities take place 4-7 pm, on the Green.

Please get back to me to let me know who among you can attend.

Many thanks!

Linda Gray
chair, Norwich Energy Committee
