RE: Clarification on the removal of the bridge on Illsley Road

Selectboard:

In my review of the CATV tape of the 1/13/16 Norwich Selectboard meeting, I noted that Dan Goulet made a comment that the bridge on Illsley Road was removed illegally by a resident.

For the record:

The bridge that was removed had been installed in 2008. There are no documents available that reference the installers had permission from the Town to install the bridge. The Town did not own or maintain the bridge.

For the record:

The bridge was in disrepair and was causing erosion to the brook banks. The resident removed the bridge only after consulting with the Town. The brook was restored with direction from the State.

Sincerely,

Richard M. Kenney
