

## **Guide to Survey Numbers 401 - 551**

### **In this guide there are two sections. 1: The Record by Number.**

Many of the main entries by which the survey sheets are recorded are persons. They appear as either the grantor or grantee. In other cases the grantor or grantee is not an individual but an entity like the Vermont Department of Highways or the Norwich Fire District; a company, like the New England Telephone & Telegraph Company or the Boston & Maine Railroad, the Bellows Falls Hydro-Electric Corporation; or an institution like Dartmouth College.

An attempt has been made to relate each survey to a specific deed. This attempt has not always been successful. The difficulty usually comes when a government agency or a large corporation is involved and our collection of surveys is incomplete. Because the project in hand extends far beyond the town line and we have only the Norwich surveys. An example of this is U.S Route 5 north towards Thetford which was worked over at various times in the process of straightening, raising, or otherwise improving it. Such work always included dealing with landowners and other abutters as well. And, of course, failure on this searcher's part has to be factored in.

The Record by Number includes a description of the information on each survey including the location of the property, identification of the surveyor, when the survey was made. If the parcel had been laid out in lots to be sold, acreage and names of owners are given. All abutters and other pertinent information are noted.

### **2. The Record by Names.**

There should be an entry for every person identified as either grantor or grantee. There will be entries for all entities that are grantors or grantees. As above in The Record by Number searchers will find the Central Vermont Public Service, the Vermont Department of Highways, the Connecticut & Passumpsic Rivers Railroad, the, Norwich Water Supply Company, the American Legion Post #8, the Norwich Inn, etc. Abutters are included; in fact, any name whether personal or otherwise will be listed if there is a likelihood that someone would look for it. In some cases a name not on a survey but appearing in a deed, as grantor or grantee will be included. These are identified by (D) following the survey number: 506 (D) Occasionally an exception has been made and a grantor or grantee will be in both places, i.e., in both the survey description and in a deed.

### **3. Inclusion of Surveyors.**

As noted above, the names of surveyors are part of the information supplied in The Record by Number. They do not appear in The Record by Names but are grouped separately at the end of it.

## Background Notes: What Went Before

Earlier, these surveys were kept in so-called Map Books. When that system was abandoned, the surveys were sent off to be encapsulated and are now arranged by numbers on hangers. The company which did the work, prepared, and sent back to the Town Clerk, a so-called Norwich Vt. Cross Reference Index which is kept on a table in the Assistant Town Clerk's office. Its order is numerical and replicates the previous Map Book A, Map Book B, Map Book C, and Map Book 1.

a. The work was not flawless and necessitated including explanatory notes in The Record by Number. For example, when surveys are out of order directional notes alert the user.

b. A penciled index was once maintained on ledger-sized sheets. These were retained and inserted in The Record by Number. They exist for the Map Books A, B, C, and I.. Following is a listing of them as they appear in the Norwich, Vt. Cross Reference Index.

- 401 - 402 covers A - K (Cross Reference Index, Map Book A)
- 435 - 438 covers L - Z (Cross Reference Index, Map Book B)
- 484 - 486 covers A - Z (Cross Reference Index, Map Book C)
- 540 - 541, (Cross Reference Index. Map Book I Index A-Z. 6 pages  
Below is what is there:  
Number 538 A - P (Cross Reference Index Map Book i )  
Number 539 No index sheets.  
Number 540. No index sheets.  
Number 541 which covers Q - Z. (Cross Reference Index. Map Book 1)

Be aware that any later corrections are not noted on the original index sheets..

c. One drawer in the catalog in the vault is identified as a Map Index. Brief information is given for each survey; however, this is not a complete listing of all the surveys.

## Afterthoughts

The 401 - 551 group is part of a larger survey collection. So far as I am aware, there is little or no real approach to any of them by subject. I have wondered about the possibility of there being related surveys for topics about which there have been inquiries. For example, an Afro-American is said to have lived in the Tigertown Road and Mitchell Lake area bordering the Hartford line in the 1920s and 1930s. Who was he? There are deeds which refer to "darky bridge" and "darky corner." At least one survey shows a location. Are there surveys in the other groups that would cover the same area and appropriate time? There is a little coverage of the Appalachian Trail in Norwich but it is

more extensive in the other survey categories. At this point the approach has to be by name and knowing names to get at localities.. The subject approach presents a challenge, plus ingenuity, to pursue.

2008
