

At its regular meeting time on April 2, 2015, the Milton Frye Nature Area Committee held a public walk to visit potential sites for construction of the proposed educational structure in the nature area. Participants were Douglas Brown, George Clark, Dan Goulet, Phyllis Katz, Ashley Morse, Nathaniel Perron, Kevin Perron, and Lindsay Putnam. The final choice of sites was narrowed to three, two of which are close together. Details of construction for the small structure were discussed. Because the structure is to be located off an existing trail, a short connecting trail will need to be built, and description of that trail should be included with the proposal to be submitted for review by the Selectboard and Upper Valley Land Trust.

Respectfully submitted,
George Clark
