Norwich Board of Civil Authority 300 Main St. P.O. Box 376 Norwich, Vermont 05055

RE: NOTICE OF APPEAL; 694 GOODRICH FOUR CORNERS ROAD

Dear Board of Civil Authority:

My client, Victor P. LLC, hereby appeals the Board of Listers' August 15, 2025 decision regarding their grievance of the 2025 tax assessment of their real property at 694 Goodrich Four Corners Road pursuant to 32 V.S.A. § 4404. The entirety of that record is incorporated by reference herein.

On August 15, 2025, the Board of Listers sent a notice that it had approved a downward modification of total property valuation to \$3,036,600 from an initial valuation of \$3,376,000. This determination still far exceeds the property's fair market value (FMV), the only touchstone of this entire process.

In addition to the materials included in the grievance proceedings, which we hereby resubmit for this appeal, Victor P. LLC is submitting an appraisal from Torrey Appraisals in Strafford, Vermont. We reserve the right to supplement the record in this appeal up to, and including, the date of hearing. 32 V.S.A. § 4404(a). We also submit a series of photographs that depict rooms in the house before and after my clients moved in. The purpose of this demonstration is to show the BCA that my clients have not engaged in any significant upgrades to the house, aside from those previously specified, including a new roof, interior and exterior paint, a wood floor in the attic, lightning rods, and a generator. The fundamental character and quality of finishes have not changed since they purchased the home in July 2020 for \$1,850,000.

I. DETERMINATION OF FAIR MARKET VALUE

As an initial matter, aside from any data sets the Town or its contractor has employed for populating values on the lister cards, the guiding principle of a reassessment is to determine the FMV of each property. The FMV is defined as "the price which the property will bring in the market when offered for sale and purchased by another." 32 V.S.A. § 3481(1). To this end, listers have three acceptable methods for arriving at the FMV—the cost approach, the market approach, and the income approach; however, the market approach is "the most persuasive method of appraising residential property in Vermont." Barrett v. Town of Warren, 2005 VT 107, ¶ 6. If done properly, on the other hand, each method should arrive at the same valuation.

While it is provisionally true that lister valuations in Vermont enjoy a presumption of validity, <u>Vermont Electric Power Company, Inc. v. Town of Vernon, 174 Vt. 471 (2002)</u>, the Supreme Court has stated many times that "[a]ny admissible evidence can rebut the presumption, whatever we may ultimately think of the evidence's weight." <u>Id</u>. Indeed, it is the job

of the BCA and the courts, if further appeals are taken, to "determine whether the testimony offered by the taxpayer challenging the listing can afford a rational basis for that which the taxpayer seeks to prove." <u>Id</u>. Indeed, in that same case, the Supreme Court characterized the presumption as a "bursting bubble." <u>Id</u>. at 473.

II. LISTERS' PUBLIC COMMENTS

In widely disseminated comments in public forums in the Upper Valley, the listers have represented that KRT Appraisals failed to perform as expected under the contract with the Town. In an August 20, 2025 article in the Valley News, Cheryl Lindberg, Chair, said that "Delays, errors on property cards and a lack of interior inspections by the firm contracted to carry out the reassessment has left the listers with lingering concerns over the reappraisal process, Lindberg said." These comments are in addition to multiple comments on the Norwich Listserve by the listers to the same effect.

This extraordinary public disclosure of issues relating to KRT by itself "bursts the bubble" of the presumption of validity. The Listers have admitted in public comments that KRT made errors on property cards, failed to carry out interior inspections, and other issues to such an extent that the listers themselves were left "with lingering concerns over the reappraisal process."

The BCA cannot, in good faith, presume that my clients' assessment is entitled to a presumption of validity where the Listers themselves do not presume the validity of the reassessment.

III. APPRAISAL

Torrey Appraisals, Inc. was commissioned to perform an appraisal of the subject property using a sales-comparison approach. Torrey Appraisals, Inc.'s opinion of value was \$2,475,000, which is nearly 20% less than the Town's assessed value. This opinion of value is accurate both for April 1, 2025, and September 1, 2025, the effective date of the report. It is especially interesting to note that Torrey Appraisals determined that the FMV fell extremely close to Story Jenk's (of Landvest) opinion of value as being between \$2,300,000 and \$2,400,000. Torrey's appraisal was determined entirely independent of Story Jenk's broker's opinion.

Torrey Appraisals also pointed out the following: The Town of Norwich has the third-floor finish at 100% of the full square footage. However, the third floor has eaves and a knee wall. These features mean that an adult cannot stand upright on much this floor. The appraiser, Linda Vaughan, therefore reduced the finished square footage of the third floor to reflect a three-quarter finish, reducing the overall square footage to 6353 square feet.

Furthermore, with respect to the basement, Linda noted that "most rooms in the basement are only minimally finished with some walls being only painted cement and not drywall and some drywall not finished off or lacking trim and basement finish is not 80% as it states on the tax card but is closer to the 58% used in the appraisal. Basement is not finished to the same quality as the rest of the house."

Given that the purpose of the reassessment was to determine the FMV of 694 Goodrich Four Corners, it is hard to square the Town's assessment of more than three million with an independent appraiser's opinion of value of more than 20% less.

IV. GRADE FACTOR

The Listers have overinflated the grade factor of 694 Goodrich Four Corners. A survey of the grade factors of the ten other properties that saw a 7.5% or greater increase in 2025 value reassessment demonstrates this overinflation. The average grade factor for these properties is 1.55.

Parcel ID	Location	Grade Value
10-028-000	1046 Beaver Meadow	2.5
11-068-000	694 Goodrich Road	2.0
14-008-000	915 Wallace Rd	1.25
04-048-000	430 Upper Turnpike	1.95
09-026-000	256 Tucker Hill Rd	1.25

05-077-000	1285 Union Village	1.95
20-132-000	383 Main Street	2.1
09-052-000	495 Tigertown Rd	1.25
20-310-000	139 Elm Street	1.6
09-043-000	1208 Bragg Hill Rd	1.25

Moreover, as an interesting comparator, the following three properties include primary residences constructed in 2020, 2021, and 2022 respectively. Each has a "Grade Factor" of 1.60. The grade factor for these properties is challenging to square with the 2.0 grade factor applied to 694 Goodrich Four Corners Road, a 225-year-old property with an effective build date of 2003.

401 Bragg Hill Road

This contemporary home was built in 2020. It has a hard board exterior and 2520 square feet. Its grade factor is 1.60.

440 Beaver Meadow Road

This contemporary home was built in 2021. It has a primarily wood exterior and 2861 square feet. Its grade factor is 1.60.

40 Mystic Drive

This colonial was built in 2022. It has a clapboard exterior and 2240 square feet. Its grade factor is 1.60.

V. CONCLUSION

For the above reasons, I respectfully request the Board of Civil Authority reassess 694 Goodrich Four Corners to its FMV, which my client argues is \$2,475,000. The current assessed value bears little resemblance to "the price which the property will bring in the market when offered for sale and purchased by another." 32 V.S.A. § 3481(1).

Yours Sincerely,

DesMeules, Olystead & Ostler

Does the project contain any multi-dwelling units? Yes No Data Source Are the units, common elements, and recreation facilities complete? Yes No If No, describe the status of completion. Are the common elements leased to or by the Homeowners' Association? Yes Ito If Yes, describe the rental terms and options Describe common elements and recreational facilities.

File# 0825-356

This report form is designed to report an appraisal of a one-unit property or a one-unit property with an accessory unit; including a unit in a planned unit development (PUD). This report form is not designed to report an appraisal of a manufactured home or a unit in a condominium or cooperative project.

This appraisal report is subject to the following scope of work, Intended use, Intended use, Intended use, definition of market value, statement of assumptions and limiting conditions, and certifications. Modifications, additions, or deletions to the intended use, intended user, definition of market value, or assumptions and limiting conditions are not permitted. The appraiser may expand the scope of work to include any additional research or analysis necessary based on the complexity of this appraisal assignment. Modifications or deletions to this appraisal report, such as those required by law or those related to the appraiser's continuing education or membership in an appraisal organization, are permitted.

SCOPE OF WORK:

The scope of work for this appraisal is defined by the complexity of this appraisal assignment and the reporting requirements of this appraisal report form, including the following definition of market value, statement of assumptions and limiting conditions, and exterior areas of the subject property, (2) inspect the neighborhood, (3) inspect each of the comparable sales from at least the street, (4) research, verify, and analyze data from reliable public and/or private sources, and (5) report his or her analysis, opinions, and conclusions in this appraisal report.

INTENDED USE: The Intended use of Ihls appraisal report is for the lender/client to evaluate the property that is the subject of Ihls appraisal for a mortgage finance transaction.

INTENDED USER: The intended user of this appraisal report is the lender/client.

DEFINITION OF MARKET VALUE:

The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller, each acting prutently, knowledgeably and assuming the passing of title from seller to buyer under conditions whereby:

The most probable price which a property should believe acting prutently, knowledgeably and assuming the basing prutently, knowledgeably and assuming the passing of title from seller to buyer under conditions whereby:

The most probable in the buyer and seller, each acting in the consummation of a sale as of a specified date and seller are typically motivated; (2) both parties are well informed or well advised, and each acting in what he or she considers his or her own best interest; (3) a reasonable lime is allowed for exposure in the open market; (4) payment is made in terms of cash in U. S. dollars or in terms of a sale.

The most probable price is not affected by anyone associated with the sale.

*Adjustments to the comparables must be made for special or creative financing or sales concessions. No adjustments are necessary for those costs which are normally paid by sellers as a result of tradition or law in a market area; these costs are readily identifiable since the seller pays these costs in virtually all sales transactions. Special or creative financing adjustments can be made to the comparable property by comparisons to financing terms offered by a third party institutional lender that is not already involved in the property or transaction. Any adjustment should not be calculated on a mechanical collar for dollar cost of the financing or concessions based on the appraiser's judgment.

STATEMENT OF ASSUMPTIONS AND LIMITING CONDITIONS:

The appraiser's certification in this report is subject to the following assumptions and limiting conditions:

- 1. The appraiser will not be responsible for matters of a legal nature that affect either the property being appraised or the title to it, except for information that he or she became aware of during the research involved in performing this appraisal. The appraiser assumes that the title is good and marketable and will not render any opinions about the title.
- 2. The appraiser has provided a sketch in this appraisal report to show the approximate dimensions of the improvements.

 The sketch is included only to assist the reader in visualizing the property and understanding the appraiser's determination of its size.
- 3. The appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in this appraisal report whether any portion of the subject site is located in an identified Special Flood Hazard Area. Because the appraiser is not a surveyor, he or she makes no guarantees, express or implied, regarding this determination.
- 4. The appraiser will not give lestimony or appear in court because he or she made an appraisal of the property in question, unless specific arrangements to do so have been made beforehand, or as otherwise required by law.
- 5. The appraiser has noted in this appraisal report any adverse conditions (such as needed repairs, deterioration, the presence of hazardous wastes, toxic substances, etc.) observed during the inspection of the subject property or that he or she became aware of during the research involved in performing the appraisal. Unless otherwise stated in this appraisal report, the appraiser has no knowledge of any hidden or unapparent physical defliciencies or adverse conditions of the property (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) that would make the property less valuable, and has assumed that there are no such conditions and makes no guarantees or warranties, express or implied. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist.

 Because the appraiser is not an expert in the field of environmental hazards, this appraisal report must not be considered as an environmental assessment of the property.
- 6. The appraiser has based his or her appraisal report and valuation conclusion for an appraisal that is subject to satisfactory completion, repairs, or alterations on the assumption that the completion, repairs, or alterations of the subject property will be performed in a professional manner.

File# 0825-356

APPRAISER'S CERTIFICATION:

The Appraiser certifies and agrees that:

- 1. I have, at a minimum, developed and reported this appraisal in accordance with the scope of work requirements stated in this appraisal report.
- 2. I performed a complete visual inspection of the interior and exterior areas of the subject property. I reported the condition of the improvements in factual, specific terms. I identified and reported the physical deficiencies that could affect the livability, soundness, or structural integrity of the property.
- 3. I performed this appraisal in accordance with the requirements of the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.
- 4. I developed my opinion of the market value of the real property that is the subject of this report based on the sales comparison approach to value. I have adequate comparable market data to develop a reliable sales comparison approach for this appraisal assignment. I further certify that I considered the cost and income approaches to value but did not develop them, unless otherwise indicated in this report.
- 5. I researched, verified, analyzed, and reported on any current agreement for sale for the subject property, any offering for sale of the subject property in the twelve months prior to the effective date of this appraisal, and the prior sales of the subject property for a minimum of three years prior to the effective date of this appraisal, unless otherwise indicated in this report.
- 6. I researched, verified, analyzed, and reported on the prior sales of the comparable sales for a minimum of one year prior to the date of sale of the comparable sale, unless otherwise indicated in this report.
- 7. I selected and used comparable sales that are locationally, physically, and functionally the most similar to the subject property.
- 8. I have not used comparable sales that were the result of combining a land sale with the contract purchase price of a home that has been built or will be built on the land.
- 9. I have reported adjustments to the comparable sales that reflect the market's reaction to the differences between the subject property and the comparable sales.
- 10. I verified, from a disinterested source, all information in this report that was provided by parties who have a financial interest in the sale or financing of the subject property.
- 11. I have knowledge and experience in appraising this type of property in this market area.
- 12. I am aware of, and have access to, the necessary and appropriate public and private data sources, such as multiple listing services, tax assessment records, public land records and other such data sources for the area in which the property is located.
- 13. I obtained the information, estimates, and opinions furnished by other parties and expressed in this appraisal report from reliable sources that I believe to be true and correct.
- 14. I have taken into consideration the factors that have an impact on value with respect to the subject neighborhood, subject property, and the proximity of the subject property to adverse influences in the development of my opinion of market value. I have noted in this appraisal report any adverse conditions (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) observed during the inspection of the subject property or that I became aware of during the research involved in performing this appraisal. I have considered these adverse conditions in my analysis of the property value, and have reported on the effect of the conditions on the value and marketability of the subject property.
- 15. I have not knowingly withheld any significant information from this appraisal report and, to the best of my knowledge, all statements and information in this appraisal report are true and correct.
- 16. I stated in this appraisal report my own personal, unbiased, and professional analysis, opinions, and conclusions, which are subject only to the assumptions and limiting conditions in this appraisal report.
- 17. I have no present or prospective interest in the property that is the subject of this report, and I have no present or prospective personal Interest or bias with respect to the participants in the transaction. I did not base, either partially or completely, my analysis and/or opinion of market value in this appraisal report on the race, color, religion, sex, age, marital status, handlcap, familial status, or national origin of either the prospective owners or occupants of the subject property or of the present owners or occupants of the properties in the vicinity of the subject property or on any other basis prohibited by law.
- 18. My employment and/or compensation for performing this appraisal or any future or anticipated appraisals was not conditioned on any agreement or understanding, written or otherwise, that I would report (or present analysis supporting) a predetermined specific value, a predetermined minimum value, a range or direction in value, a value that favors the cause of any party, or the attainment of a specific result or occurrence of a specific subsequent event (such as approval of a pending mortgage loan application).
- 19. I personally prepared all conclusions and opinions about the real estate that were set forth in this appraisal report. If I relied on stignificant real property appraisal assistance from any individual or individuals in the performance of this appraisal or the preparation of this appraisal report, I have named such individual(s) and disclosed the specific tasks performed in this appraisal appraisal report. I certify that any individual so named is qualified to perform the tasks. I have not authorized anyone to make a change to any item in this appraisal report; therefore, any change made to this appraisal is unauthorized and I will take no responsibility for II.
- 20. I identified the kender/client in this appraisal report who is the individual, organization, or agent for the organization that ordered and will receive this appraisal report.

Main File No. 0825-356 Page # 8

Supplemental Addendum

		Supplementa		File No. 0825-356				
Borrower	Sunny Payson							
Property Address	694 Goodrich Four Cor							
City	Norwich	County	Windsor	State	VT	7ip Code	05055	
Lender/Client	Sunny Payson							

The sales comparison approach is the one most used by appraisers to help them determine the current market value of a property. When using this approach the appraiser uses the most similar and recent sales in the local market and makes adjustments to the sales prices for the differences that most effect the value. Adjustments are taken from the local market and represent what a typical buyer would pay for that particular difference in the properties. The adjusted values are then compared to come up with the most likely current value.

Subject home is larger than most homes in the area and has more acreage so it was necessary to use 2 sales over 12 months to bracket certain features and it was also necessary to use sales outside of Norwich. Subject year built is 1800 per town records but was moved to the lot in 2003 and rebuilt with additions and put on a new foundation and was considered to be more

#1 was the most similar sale to bracket subject acreage but is located in Woodstock which is a higher market area due to being a tourist destination and sale was adjusted 20% for location.

#2 is located in Hanover but was the most similar sale to bracket square footage. Hanover is the location of Dartmouth College and is a higher market and the sale was adjusted 25% for location.

#3 was one of the more similar sales in Norwich since it has acreage and the home has reproduction features but is much smaller and has a long range mountain view.

#4 was used to have a sale similar in age, home is a 200 year old Colonial that has been totally remodeled and is very similar in quality and is one of the more similar recent sales in Norwich in size,

Adjustments in this appraisal:

Site per unit acreage used in this report: \$5,000 per acre, no adjustments under 1 acre difference Above Grade SF used in this report: \$185 per SF, \$75 per SF below grade

Garage spaces \$5k, built-in garage spaces \$3k, baths \$5k, half baths \$2.5k, large porches \$5k, porches \$2.5k, large decks/patios \$3k, avg decks/patios \$1.5k, fireplaces \$3k, gas stove/woodstove \$1.5k, AC \$10k, generator \$10k, solar panels \$15k, oversize garage \$2.5k, heated garage \$1.5k, pond \$5k, small pond \$2.5k, shed \$500, tennis court \$2.5k.

Barn on #3 was adjusted \$25k, barn on #1 was adjusted \$15k since it was smaller, #2 had 1161sf fin over the garage that was adjusted \$100xsf, #3 had 2 finished office spaces totaling 400sf that were adjusted \$50xsf. Subject outbuildings were given \$25k total.

Reconciliation of an Opinion of Value

Appraiser is anchoring the Opinion of Value to the adjusted value of comp 1 as it has the lowest gross adjust. Comp 4 receives the 2nd most weight as it has the 2nd least gross, then #2, then #3.

Disclaimer

Appraiser is not a contractor, attorney or home inspector,

Appraiser does not guarantee that there are no physical deficiencies that would not be apparent to a typical appraiser/appraisal inspection or that which would require the expertise of a home inspector. Any estimates of cost-to-cure are approximate. Also, appraiser does not guarantee that there are no deficiencies of title or the existence of prior transfers that are not accessible by traditional appraiser means (i.e. appraiser searches online property databases that may have address or name errors thereby precluding appraiser from locating the entry). Additionally, property databases used by appraiser usually do not contain the most recent transactions as they have not been entered into their database. Lenders should rely on their title search for most recent transfers of subject property.

Note: The town of Norwich has the 3rd floor finish at 100% of the full square footage but the 3rd floor has eaves and a kneewall, there is a vaulted ceiling but still loses some usable area due to the pitch of the roof/ceiling. The finished square footage was reduced to reflect a 3/4 story of finish and not a full story. Most rooms in the basement are only minimally finished with some walls being only painted cement and not drywall and some drywall not finished off or lacking trim and basement finish is not 80% as it states on the tax card but is closer to the 58% used in the appraisal. Basement is not finished to the same quality as the rest of the house.

UNIFORM APPRAISAL DATASET (UAD) DEFINITIONS ADDENDUM

(Source: Fannle Mae UAD Appendix D: UAD Field-Specific Standardization Requirements)

Condition Ratings and Definitions

C1

The improvements have been recently constructed and have not been previously occupied. The entire structure and all components are new and the dwelling features no physical depreciation.

Note: Newly constructed improvements that feature recycled or previously used materials and/or components can be considered new dwellings provided that the dwelling is placed on a 100 percent new foundation and the recycled materials and the recycled components have been rehabilitated/remanufactured into like-new condition. Improvements that have not been previously occupied are not considered "new" if they have any significant physical depreciation (that is, newly constructed dwellings that have been vacant for an extended period of time without adequate maintenance or upkeep).

C2

The improvements feature no deferred maintenance, little or no physical depreciation, and require no repairs. Virtually all building components are new or have been recently repaired, refinished, or rehabilitated. All outdated components and finishes have been updated and/or replaced with components that meet current standards. Dwellings in this category are either almost new or have been recently completely renovated and are similar in condition to new construction.

Note: The improvements represent a relatively new property that is well maintained with no deferred maintenance and little or no physical depreciation, or an older property that has been recently completely renovated.

C3

The improvements are well maintained and feature limited physical depreciation due to normal wear and tear. Some components, but not every major building component, may be updated or recently rehabilitated. The structure has been well maintained.

Note: The improvement is in its first-cycle of replacing short-lived building components (appliances, floor coverings, HVAC, etc.) and is being well maintained. Its estimated effective age is less than its actual age. It also may reflect a property in which the majority of short-lived building components have been replaced but not to the level of a complete renovation.

C4

The improvements feature some minor deferred maintenance and physical deterioration due to normal wear and tear. The dwelling has been adequately maintained and requires only minimal repairs to building components/mechanical systems and cosmetic repairs. All major building components have been adequately maintained and are functionally adequate.

Note: The estimated effective age may be close to or equal to its actual age. It reflects a property in which some of the short-lived building components have been replaced, and some short-lived building components are at or near the end of their physical life expectancy; however, they still function adequately. Most minor repairs have been addressed on an ongoing basis resulting in an adequately maintained property.

C5

The improvements feature obvious deferred maintenance and are in need of some significant repairs. Some building components need repairs, rehabilitation, or updating. The functional utility and overall livability is somewhat diminished due to condition, but the dwelling remains useable and functional as a residence.

Note: Some significant repairs are needed to the improvements due to the lack of adequate maintenance. It reflects a property in which many of its short-lived building components are at the end of or have exceeded their physical life expectancy but remain functional.

C6

The improvements have substantial damage or deferred maintenance with deficiencies or defects that are severe enough to affect the safety, soundness, or structural integrity of the improvements. The improvements are in need of substantial repairs and rehabilitation, including many or most major components.

Note: Substantial repairs are needed to the improvements due to the lack of adequate maintenance or property damage. It reflects a property with conditions severe enough to affect the safety, soundness, or structural integrity of the Improvements.

Quality Ratings and Definitions

Q

Dwellings with this quality rating are usually unique structures that are individually designed by an architect for a specified user. Such residences typically are constructed from detailed architectural plans and specifications and feature an exceptionally high level of workmanship and exceptionally high-grade materials throughout the Interior and exterior of the structure. The design features exceptionally high-quality exterior refinements and ornamentation, and exceptionally high-quality interior refinements. The workmanship, materials, and finishes throughout the dwelling are of exceptionally high quality.

Q2

Dwellings with this quality rating are often custom designed for construction on an individual property owner's site. However, dwellings in this quality grade are also found in high-quality tract developments featuring residence constructed from individual plans or from highly modified or upgraded plans. The design features detailed, high quality exterior ornamentation, high-quality interior refinements, and detail. The workmanship, materials, and finishes throughout the dwelling are generally of high or very high quality.

UNIFORM APPRAISAL DATASET (UAD) DEFINITIONS ADDENDUM

(Source: Fannie Mae UAD Appendix D: UAD Field-Specific Standardization Requirements)

Quality Ratings and Definitions (continued)

03

Dwellings with this quality rating are residences of higher quality built from individual or readily available designer plans in above-standard residential tract developments or on an individual property owner's site. The design includes significant exterior ornamentation and interiors that are well finished. The workmanship exceeds acceptable standards and many materials and finishes throughout the dwelling have been upgraded from "slock" standards.

Q4

Dwellings with this quality rating meet or exceed the requirements of applicable building codes. Standard or modified standard building plans are utilized and the design includes adequate fenestration and some exterior ornamentation and interior refinements. Materials, workmanship, finish, and equipment are of stock or builder grade and may feature some upgrades.

Q5

Dwellings with this quality rating feature economy of construction and basic functionality as main considerations. Such dwellings feature a plain design using readily available or basic floor plans featuring minimal fenestration and basic finishes with minimal exterior ornamentation and limited interior detail. These dwellings meet minimum building codes and are constructed with inexpensive, stock materials with limited refinements and upgrades.

Q6

Dwellings with this quality rating are of basic quality and lower cost; some may not be sultable for year-round occupancy. Such dwellings are often built with simple plans or without plans, often utilizing the lowest quality building materials. Such dwellings are often built or expanded by persons who are professionally unskilled or possess only minimal construction skills. Electrical, plumbing, and other mechanical systems and equipment may be minimal or non-existent. Older dwellings may feature one or more substandard or non-conforming additions to the original structure

Definitions of Not Updated, Updated, and Remodeled

Not Updated

Little or no updating or modernization. This description includes, but is not limited to, new homes.

Residential properties of fifteen years of age or less often reflect an original condition with no updating, if no major components have been replaced or updated. Those over fifteen years of age are also considered not updated if the appliances, fixtures, and finishes are predominantly dated. An area that is 'Not Updated' may still be well maintained and fully functional, and this rating does not necessarily imply deferred maintenance or physical/functional deterioration.

Updated

The area of the home has been modified to meet current market expectations. These modifications are limited in terms of both scope and cost.

An updated area of the home should have an improved look and feet, or functional utility. Changes that constitute updates include refurbishment and/or replacing components to meet existing market expectations. Updates do not include significant alterations to the existing structure.

Remodeled

Significant finish and/or structural changes have been made that increase utility and appeal through complete replacement and/or expansion.

A remodeled area reflects fundamental changes that include multiple alterations. These alterations may include some or all of the following: replacement of a major component (cabinet(s), bathtub, or bathroom tile), relocation of plumbing/gas fixtures/appliances, significant structural alterations (relocating walls, and/or the addition of) square footage). This would include a complete guiting and rebuild.

Explanation of Bathroom Count

Three-quarter baths are counted as a full bath in all cases. Quarter baths (baths that feature only a toilet) are not included in the bathroom count. The number of full and half baths is reported by separating the two values using a period, where the full bath count is represented to the left of the period and the half bath count is represented to the right of the period.

Example:

3.2 indicates three full baths and two half baths.

Appeal Basis/Summary

- We purchased the property 7/10/2020 for \$1,850,000.
- Repair/maintenance (new roof, int/ext paint) expenses total \$280k
- Improvement (attic wood floor, lightning rods, generator) expenses total \$46k
- KRT had full interior/exterior access for their assessment
- 2024 valuation was \$1,670,700
- Proposed 2025 valuation is \$3,387,600
- Increase of \$1,716,900/103% from 2024 to proposed for 2025 (town-wide average: 62%)
- Increase of \$1,537,600/83% from our 2020 purchase price (32% avg increase for Norwich homes that also sold in 2020)
- Broker Opinion of Value estimate from LandVest between \$2,300,000 and \$2,400,000

Contents

Attached File 1 "11-068-000.pdf": PDF containing this letter, Broker Opinion of Value (1a, 4 pages), and printable versions of our supporting data (1b-2c below).

Attached File 2 "11-068-000 - Data.xlsx": Spreadsheet with our supporting data in sheets labeled 1a-2c, corresponding to items below. We recommend using this file to check/verify data, but not to print, as it contains the entire list (30 pages) of Norwich properties. This list is abbreviated in PDF above, which is a better option for printing.

Section 1) Fair Market Value

- a) Broker Opinion of Value from Dia and Story Jenks of LandVest (realtor with extensive local experience)
- b) Comparison of similar Norwich properties sold in last 5 years
- c) Comparison of three Norwich properties sold in 2019-2021 and again in 2024/2025
- d) List of repairs/improvements

Section 2) Comparable Assessments

- a) Comparison of other properties with similar 2024 valuation
- b) Comparison of other properties with similar proposed 2025 valuation
- c) Comparison to town-wide average increase of 62%

Section 3) Data Errors

a) KRT was given full interior/exterior access for the 2025 assessment. Their updates seem to reflect corrections.

General Comments/Conclusion

Section 1) Fair Market Value

- **1a)** Dia and Story Jenks of LandVest (who represented the sellers of the property) have provided a Broker's Opinion of Value estimating fair market value to be between \$2,300,000 to \$2,400,000. They compare 3 similar properties that sold recently, adjusting for differences.
- **1b)** Our analysis of comparable properties that were sold in Norwich from 2020-2023 (sourced from Zillow, Redfin, and Realtor.com). Our property's increase from 2020 sale to proposed 2025 valuation was 83%. For comparison, see the similar properties below. The first 5 (light yellow rows) averaged a 32% increase from their 2020 purchase price to their proposed 2025 assessment.
- **1c)** Here are three properties that sold in the last year+ *and also* 4-5 years before (around when we bought ours). We can see how much they appreciated in value based on their actual sale amount. The property at 95 Elm St is comparable to ours in size and acreage, sold within 5 months of when we bought ours, and then again at the beginning of July, 2025. The other two examples also demonstrate how property values have increased since we bought in 2020.

The three recently sold properties show increases of 35% (95 Elm), 56% and 28%, compared to our property's 83% increase.

1d) Lists of our maintenance/repairs totaling \$280k and improvements totaling \$46k, since our 2020 purchase.

Section 2) Comparable Assessments

- **2a)** We filtered the complete town data to find the 30 properties with the closest **2024 value** to ours (highlighted). Looking at all the properties within \$300k of our 2024 value, our property increased 103% compared to the average of 69%, the second highest gain.
- **2b)** Next, we filtered the full town data to find the 30 properties with the closest **proposed 2025 value** to ours (highlighted). Looking at all properties within \$1M of our proposed 2025 value, our property increased 103% compared to the average of 72%, the third highest gain.
- **2c)** Here is the full town data, extracted from original Preliminary Property Valuation Report, showing the average increase from 2024 to proposed 2025 value as 62%.

Section 3) Data Errors

3a) KRT was given full interior/exterior access for the 2025 assessment. Their updates seem to reflect corrections, rather than changes we made, with the only exception being our addition of a generator. Since buying the property in 2020, we have not made any major improvements. Below is a list of changes we noted.

- i. Square-footage increased from 6,356 to 6,752. This appears to be because the attic bathroom was not included in the previous assessment. The attic bathroom was present when we bought the property.
- ii. The 2025 assessment lists the house as built in 1800s, while the previous assessment lists 2004. This would seem to be a matter of opinion. Half of the house was re-assembled in 2003 from an 1800s farm house in 2003, while the other half was built new.
- iii. The 2025 assessment lists 5 baths and 3 half baths, while the previous assessment lists 2 baths and 3 half baths. It appears the previous assessment missed 3 baths. We did not add these. They were present when we bought the property.
- iv. The 2025 assessment lists 14 rooms, while the previous assessment lists 12. It appears the previous assessment missed 2 rooms. We did not add these. They were present when we bought the property.
- v. Bath Features, Other Features, and Depreciation/Phys Cond, sections were consistently rated higher in the new assessment than in the old. We did not make any improvements in these areas since we bought the property.
- vi. Heat Type changed from FORCED H/W to RADIANT HW in the new assessment. We did not make any changes since we purchased the property.
- vii. Several items were added under SPEC FEATURES/YARD ITEMS. All except for the generator (listed under improvements/1d) were present when we bought the property.

General Comments/Conclusion

Based on the above evidence, we believe \$2,400,000 to be a more accurate estimate of our property value. This fits within the broker opinion range, and is very close to the average 32% valuation increase of other Norwich properties that sold in 2020 (a 32% increase on our original \$1.85M purchase price would be \$2.44M).

We very much appreciate your work and the time you dedicate to what must be a monumenta	l task
Thank you.

Dia Jenks From:

Broker Opinion of Value for 694 Goodrich Four Corners Road, Norwich Re:

This evaluation is not an appraisal but is a broker's opinion. As such, it is only intended to give you a valuation from a real estate broker's point of view.

Our opinion establishes a value for the property of \$2,300,000 and \$2,400,000. See valuation below.

4 The Green, Woodstock, VT 05091

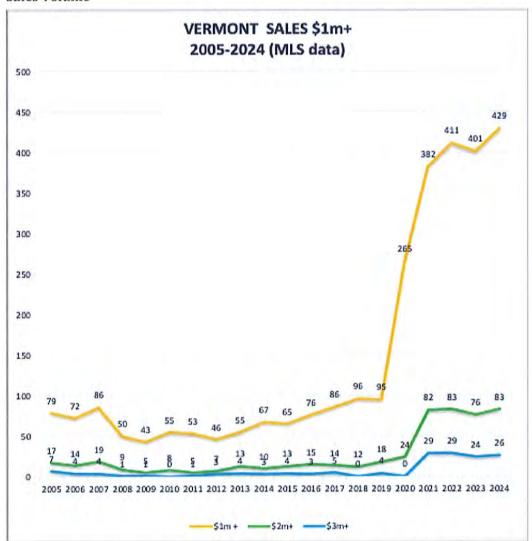

VERMONT MARKET OVERVIEW

The COVID Boom and Millennials: The coronavirus dramatically accelerated national trends:

- . Gen X and Millennials moved out of urban areas to seek a more balanced life.
- Boomers reversed plans to move in town and shifted to properties with safety and space.
- · Companies Some of their employees can operate remotely and productively.
- Climate change drove a search for properties which are more sustainable and less climate-vulnerable than
 coastal areas and regions subject to drought and wildfire.

As a result, there was a surge of buyers looked for properties in Vermont as a primary, co-primary or 2nd home that could be used for work and recreation. High speed rural internet access, sense of community and schools are an important factor in decisions of where to buy.

Sales Volume

Post COVID: The inventory of available properties above \$2mm has increased for three reasons:

- · Buyers have thinned out and more focused on value and choices;
- Sellers have been aspirational on pricing properties;
- · Days on Market have almost doubled and
- Inflated cost of building and lack of available contractors has resulted in big discounts for properties that need work.

The Vermont Upper Valley and Woodstock

We have included towns in the Vermont Upper Valley and Woodstock with sales \$2 million and up. This includes Norwich, Woodstock, Pomfret, Barnard, Hartland, and Hartford. Woodstock is the shire town and produces most of the high sales, but all of the towns have shown consistent sales and similar quality housing stock.

There have been 66 sales \$2 million and up since 2020.

Sales (millions)	\$2 - \$3	\$3 -\$4	\$4 - \$5	\$5+
Norwich	6	2	0	1
Hartford	5	0	0	2
Hartland	3	2	0	0
Woodstock	23	4	1	6
Barnard	4	1	0	0
Pomfret	3	2	1	0

Link to Properties

PROPERTY DESCRIPTION

Location: 694 Goodrich Four Corners Road, Norwich

Owner: Victor P LLC
Acres: 71.5+/- Acres
Purchase: 7/10/20

Improvements: c1800s post & beam residence rebuilt on the property in 2003.

Encumbrances: Enrolled in Current Use

Span #: 450-142-12012

The property was priced pre-COVID at \$1,850,000 and listed on February 5, 2020. It went under contract at the full asking price on June 19, 2020 with multiple offers. The sale price did not reflect the 20% to 30% increase that sales saw in late 2020 through 2022. The kitchens and bathrooms have not been renovated since it's construction in 2003, and the current owners have not made any renovations since purchase.
